

Interpon GripTex: Non-slip Powder Coatings

Textured powder coatings provide grip and non-slip safety features.

OEM tested, Interpon GripTex powder coating is an excellent alternative to wet paint and non-slip tape as it is durable, long lasting and cost effective. Easy to apply, Interpon's GripTex range of tactile powder coatings offer heavy duty benefits.

Interpon GripTex is applied using a 2-coat system: basecoat and top coat. It is easy to use and offers all the application benefits of powder coating.

Key Features & Benefits

- Provides a grip-like, slip-resistant surface, reducing the risk of slipping and falling
- Significantly lower material costs compared to a liquid paint system
- Meets AS4586-2013, P5 and D1 slip resistance ratings
- Ease of application
- Provides operational efficiencies for 2-step extrusion process
- Reduces manufacturing costs in many applications
- Provides a dramatic visual aesthetic
- Provides the performance benefits of powder coating
- Australian-made
- Factory finish

Applications

Interpon GripTex is ideal in many industries where non-slip safety features are required on walking and working surfaces.

- Agricultural
- Automotive
- Heavy Duty Truck
- Construction
- Fire Equipment
- Metal Decking and Walkways
- Mining
- Marine
- Personal Recreation

Interpon GripTex: Non-slip Powder Coatings

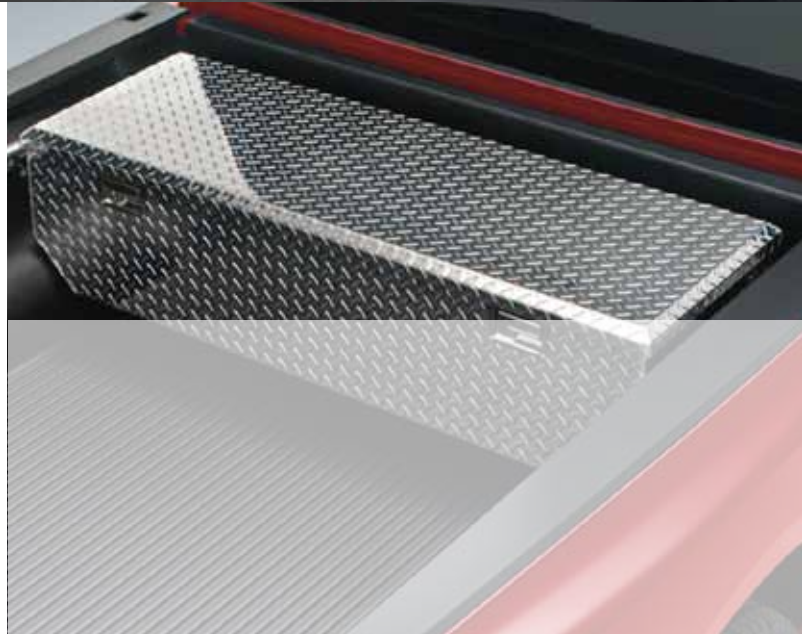

Where enhanced grip and anti-skid properties are important

- Sheet plates
- Scaffold Planks
- Transport Sections
- Agricultural equipment such as grates
- Pedals
- Walkway areas
- Mezzanine flooring in industrial applications
- Step areas on truck and heavy construction vehicles
- Truck beds, rails, side steps and bumpers
- Side rails
- Ramps
- Ladders

Interpon GripTex as a direct replacement for safety tape:

- No loss of adhesion due to gouging and penetration
- More cost effective than safety tape in many applications
- Specialty colors can be formulated
