Interpon: The Future is Looking Bright
Interpon: The Future Is Looking Bright

Interpon introduces 8 ‘Bright’ new vibrant colors to the D1000 stock range, reflecting the themes and trends of today’s market. Engineered to provide superior application performance and specifically formulated for exterior use, Interpon’s ‘Bright’ range is highly fade-resistant and is ideal for use in high UV exposure environments. Suitable for both aluminium and steel applications, every project deserves a bright future!
