

Product Data Sheet

	Interpon D1000 Textura		
Product Description	 Interpon D1000 Textura is a new generation TGIC Free Polyester based powder coating formulated on AkzoNobel proprietary resin technology. Interpon D1000 Textura is designed for the exterior environment offering excellent long term light and weather resistance from a single coat finish on a variety of substrates. Interpon D1000 Textura exhibits a tougher cured film which provides superior damage resistance to packaging materials. Interpon D1000 Textura incorporates AkzoNobel patented Particle Management Technology providing outstanding powder application and enhanced recess penetration. Interpon D1000 Textura powder coatings are available in a wide range of colours and are designed to meet or exceed the performance requirements of AS3715 and WANZ. 		
Powder Properties*	Chemical type	Polyester	
	Particle size	Suitable for electrostatic spray	
	Specific gravity	1.2 - 1.7 depending on colours	
	Storage	Dry cool conditions (below 30°C)	
	Shelf Life	18 months	
	Sales code	G-Series	
	Stoving Schedule	10 mins at 180°C or	
		5 mins at 200°C or	
		4 mins at 210°C (Object temper	rature)
Typical specifications	AS3715, WANZ, AS4506, BS	S6496, BS6497, AAMA2603	
Film properties	All tests were performed on p at 200°C (metal temperature)		ss finish powder coating stoved for 10 minutes
Mechanical Tests*	Flexibility	(Bend Test) AS1580 402.1	Pass 6mm
	Adhesion	(2mm Crosshatch) AS1580 408.4	Classification 1 maximum
	Cupping test	ISO 1520	Pass > 3mm
	Pencil Hardness Reverse Impact	AS1580 405.1 AS3715 Section 2.5.8	F – minimum Pass 2.5Nm
Chemical Durability Tests*	Salt Spray	AS3715 Section 2.5.10	Pass 1000 hours
	Humidity Resistance	AS3715 Section 2.5.7	 no creep more than 2mm from scribe Pass at 1000 hrs
	numuly resistance	A007 10 000101 2.0.7	- no blistering or loss of adhesion
	Distilled water	BS3900-F7 at 40°C	Pass – no blistering or loss of gloss after
	Immersion	Eventions A00745 offer 40 m	240hrs
	Exterior durability	Excellent - pass AS3715 after 12 mo breakdown or reduction in protective	nths continuous exposure with no film
	Colour stability	Excellent for continuous exposure up to 120°C.	
Pre-treatment		mance the following pre-treatment is reconne pre-treatment should be used in accord Multistage chrome chromate or chrome p Multistage zinc phosphate or chromate Multistage zinc or iron phosphate	ance with the supplier's recommendations.
Application	To ensure the highest cons Unused or over-sprayed po	istency of metallic coatings the powder sh wder coating can be reclaimed up to a ma	ual or automatic electrostatic spray equipment. ould always be applied from a fluidised hopper aximum of 20% using suitable equipment and laim powder to the hopper are recommended.

Interpon D1000 Textura

Additional information	Product performance warranties are available with the Interpon D1000 Textura range through accredited applicators. For further information on the available warranties and the applicable terms and conditions, please contact your local AkzoNobel sales office. AkzoNobel Pty Limited has a policy not to use lead or other heavy metal based pigments in our range of powder coatings. As a result of this policy, the use of bright and deep colours such as Yellows, Oranges and Reds are not recommended for severe outdoor exposure where long-term colour fastness is required. Interpon D1000 Textura powder coatings as supplied by AkzoNobel contain no organic solvents and can contribute toward satisfying the IEQ credits in the following Green Star® rating tools: IEQ11 Office Interiors v1.1 IEQ8 Education v1 IEQ8 Retail Centre v1		
	IEQ13 Office As-Built v2 IEQ8 Healthcare v1 IEQ8 Multi Unit Residential v1 IEQ8 Industrial v1 Note: Products are not reviewed or certified under the Green Star® rating system. Green Star® credit requirements		
	cover the performance of materials in aggregate, not the performance of individual products or brands. For more information on Green Star®, visit <u>www.gbca.org.au</u> .		
Safety Precautions	This product is intended for use only by professional applicators in industrial environments and should not be used without reference to the relevant health and safety data sheet, which AkzoNobel has provided to its customer. If for any reason a copy of the relevant health and safety data sheet is not immediately available the user should contact AkzoNobel to obtain a copy before using the product. Minimum safety precautions in dealing with all powder coatings are as follows. All dusts are respiratory irritants. Therefore, inhalation of the dust or of the vapors resulting from the cure should be avoided. Take steps to prevent skin contact, but should contact occur, wash skin with soap and water. In case of eye contact flush immediately with clean water and seek medical advice. Dust clouds of any finely divided organic material can be ignited with an electric spark or open flame. Dust and powder should not be allowed to build up on surfaces or ledges. Dust collection equipment should be used which has provision for adequate explosion release. All equipment should be electrically earthed to prevent build up of static. Users are recommended to follow the guidelines laid down in AS3754:1990, "Safe Application of Powder Coatings by Electrostatic Spraying".		
Disclaimer	IMPORTANT NOTE: The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advices given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product. Unless otherwise agreed by us in writing, any contract to purchase products referred to in this brochure and any advice which we give in connection with the supply of products are subject to our standard conditions of sale. The information contained in this data sheet is liable to modification from time to time in the light of experience and our policy of continuous product.
